

Description

This course is designed for writers who are interested in honing their writing for publication skills. Unlike our four-week technical writing class or our six-week scientific writing course, this ten-week course offers longer and more robust lectures, covers more topics, and allows writers a longer time to apply the concepts discussed.

What's Included

This course includes

- ✓ Voiced lectures (30-45 minutes each)
- ✓ Discussion and Examples supplement (pdf)
- ✓ Job/Writing Aid (pdf)
- ✓ Concepts explained/resources supplement (pdf)
- ✓ Weekly writing options
- ✓ Written feedback on submitted writing
- ✓ Certificate of completion

Topics

Week 1: Developing a Rhetorical Strategy

Week 2: Developing Effective Organizational Strategies

Week 3: Using Language Effectively

Week 4: Understanding How Readers Read

Week 5: Writing the Components of the Scientific Report

Week 6: Writing the Supplementary Components

Week 7: Using Charts, Tables, and Graphs Effectively

Week 8: Preparing and Submitting Your Article for Submission

Week 9: Creating Oral Presentations
