

“Succinct Scientific Writing” Online Course

In this fun, interactive course, participants learn how to effectively apply their critical thinking and problem-solving skills to create strategies that will result in clear, concise, targeted scientific documents.

The eight modules of this course teach the basics of clear, succinct writing, including how to avoid wordiness, write targeted documents for specific readers, write the various sections of scientific reports, and construct effective editing and proofreading strategies. Each module takes roughly 30 minutes to complete.

Topics

Module 1: Developing a Rhetorical Strategy

Module 2: Planning and Writing the Scientific Document

Module 3: Being Precise and Concise

Module 4: Using Readability Studies to Write Effective Sentences and Paragraphs

Module 5: Using Charts, Tables, and Graphs Effectively

Module 6: Writing the Components of the Scientific Paper

Module 7: Writing the Supplementary Components

Module 8: Editing and Proofreading Strategies
